

This guide will outline the steps needed to update the required 2024 Insured Production Reporting (IPR) production for the CRS policies being imported to GreatAg for 2025.

1

2024 AEROS Production Entry

- Assuming the 2024 policy has been imported into GreatAg® for 2025
- Enter the 2024 production using the AEROS “Current Production Reporting” tool in Quick Key 2024 claim production data will be updated in the 2024 AEROS APH database
- Policies with zero acreage do not have to be updated in 2024 for insured production reporting purposes, simply book the APH in GreatAg for 2025
- A 2025 AEROS Actual Production History report can be generated showing the 2024 production

2

2025 GreatAg Updating

- Agents will be locked out of updating the 2025 GA APH database until the 2024 production has been entered (step 1 above)
- A nightly file (2:00 am ET) will update the 2025 GreatAg APH database with the 2024 crop year data (including any claim related production)
- Any other changes for the 2025 APH database can then be made in GreatAg and once completed can be booked to establish the approved APH for 2025

3

Actual Production Reporting Forms

- The 2024 production reporting signature form must be uploaded in AEROS under the 2024 policy and can also be uploaded in GreatAg under the 2025 policy if desired
- 2025 GreatAg Approved APH forms can be printed individually or batched
