

Insured Production Report (IPR) - This quick card will explain the steps needed to use the production reporting workflow to report the current crop year production. The Insured's Production Reporting Date is the date provided by RMA's actuarial data and is when a production report for the current crop year is due, unless otherwise specified in the policy or FCIC-approved procedures.

Insured Production Reporting References

2025 General Standards Handbook - Exhibit 2 - Various definitions have Insured's Production Reporting. **2025 Crop Insurance Handbook** - PART 13: PRODUCTION REPORT

Section 1: Insured's Production Reporting for CCIP and ARPI
Paragraph 1301 - 1310 (pages 188-212)

Section 2: Previous Crop Year Production Reporting for CCIP Policies
Paragraph 1321 - 1330 (pages 213-230)

RMA Actuarial Data Browser - The Dates tab contains the published Insured Production Reporting Date. **Plans of Insurance** - The following plans of insurance now have current year production reporting in 2024: Area Yield Protection (04), Area Revenue Protection (05), Area Revenue Protection w/HP exclusion (06), Margin Protection (16), Margin Protection with HP (17), Yield Protection (01), Revenue Protection (02), Revenue Protection w/HP exclusion (03), Actual Revenue History (47) and APH (90).

Reporting Forms - We offer several reporting forms for you to use to report the insured's current year production:

- 2024 M205 - Schedule Of Insurance (SOI) with Production Report
- 2024 M202 – Production and Yield Reporting form
- 2024 M711 – Revenue Loss Worksheet and Production Report
- 2024 G205 – Map Based Schedule of Insurance

Workflows

The only policy maintenance workflow allowed to enter current crop year production is the 'Report 2024 Production by Unit' when in the **2024 reinsurance year**. You will no longer be able to update the 2024 crop year production when in the 2025 reinsurance year.

Report 2024 Production by Unit

This workflow screen has the following key columns of data for current year production reporting. You can use the 'Enter' key to tab to the next entry column. Using the 'Shift' 'Tab' will move the cursor to the prior column.

1) Production Record Type- Select the correct production record type. Once selected a pop-up will allow you to apply this production record type to other lines for that county/ crop. You can select all or specific lines.

2) 2024 Production- Enter the total production for the unit. There is a red asterick to the right of the line if the line has any linked APH's to the line. The hover will show the other line number.

3) 2024 Acres- The acres reported on the 2024 acreage report for this line. The sum of the acres will be shown on hovering over the 2024 Acres. The acreage can not be changed.

4) Determined Acres- If any acreage had been reported incorrectly in 2024, for example, despite planting 80 acres of corn, the producer only reported 75 acres for the unit, you should notify your underwriter so that the correct acres can be entered in the Determined Acres column. Acreage revised per claim will be shown in this same column.

5) 2024 Yield - The yield will calculate if production is entered or you enter the yield to calculate the production.

6) Yield Type - The yield will calculate if production is entered or you enter the yield to calculate the production.

7) Insurability Code - This will default based on prior entries in most cases. The choices are Insurable, Uninsurable, and Uninsured Acres.

8) IPR - Shows the status of the line. Red 'I' - 'Incomplete' (hovering over this will show the reason) or Green 'C' for Complete.

A - Harvested Production: sold/commercial storage.
B - Harvested Production: farm stored/measured by insured.
C - Harvested Production: pick/daily sales records.
D - Harvested Production: automated yield monitoring system.
E - Harvested Production: farm stored/measured by authorized representative.
F - Harvested Production: livestock feeding records.
G - Harvested Production: field harvest records.
H - Harvested Production: other.
I - Unharvested and destroyed. (ARPI only)
J - Unharvested and put to another use. (ARPI only)
K - Unharvested and production appraised by AIP (ARPI Only).
L - Unreported production. P26 Only.
M - Claim for indemnity. For CCIP policies only.
N - Appraisal (non-loss). For CCIP policies only.
O - UUF or third party damage
P - Unharvested with Harvest incomplete. (ARPI only).
Q - Zero production when no claim/appraisal/UUF/3rd party or production record. For CCIP policies only.
R - Harvested Production: Actual production allocated using pre-harvest appraisals
S - Appraisal (uninsured cause of loss not UUF or 3rd party). Actual production. For CCIP policies only.
T - No production. Unharvested, delayed claim or records unavailable from processor. Not for ARPI).

Select lines to set Prod Rec Type

Policy Details: On the 'Policy Details' tab, by hovering over the green C with your mouse, you will see a pop-up window indicating what is complete. In this scenario with a total of 3 acreage lines for the county/crop in 2024CY, 2 lines were booked, 0 lines unbooked and 1 not applicable which would be considered a line that had zero acres reported in 2024 or was an uninsurable line with zero acreage.

Ellsworth (53)	Wheat (11)	C	C	C	2 booked / 0 unbooked / 1 not applicable			

Production Reporting Dates: Production sign dates can be entered in the County/Crop drop down menu or by selecting the APH icon on the Icon Menu. Only the insured signed date is required, the agent signature is optional and not required per procedure. We will be changing the booking logic later in November 2024 to allow booking of APH without the agent signature. If a policy has not rolled to the next year, nothing is needed to be done in the next year. Once rolled the policy will re-rate and book as long as the prior year production has been updated and booked.

Important Notes

- Upon saving, the 2024 production will be shown in the 2025 reinyear for the 2024 crop year on the APH tab. You can edit the past 2 years in the APH database.
- If the producer reports the 2024 acres as planted to the wrong crop or fails to report the acres at all, please contact your underwriter because we must make changes to the 2024 policy to allow the entry of the 2024 production.
- The Companion processing feature is still available through the Insured Production Reporting (IPR) workflow and has not changed.

M202 APH Form

When printing the M202 APH 10 year report after entering the production, the production will show for the 2024 crop year. The legend now shows the 'Insurability' codes.

YR-PRT ²	Production	Acres	Yield Desc	Pre-Qual Prod	Pre-Qual Yield	Pre-Qual Opt Out	Yield w YA	Yield w TA	Yield w YE	YE Opt Out

P=75% Prev Apprvd Yld or 65% T-Yield
PA=Prorated Actual Production
T=Transitional Yield
Z=Zero Acres Planted

-C=Verified By Audit

-L=Signed Loss Production Information

1) Multi Crop Year Reporting Reason Legend:

- (1) Certification of crop years not previously certified
- (2) Correction
- (3) Replacement of temporary yield
- (4) Replacement of assigned yields
- (5) Certified by new Insured
- (6) Certified using another producer's history for new acreage
- (7) Recertification for new actuarial offer
- (8) Recertification for new unit structure
- (9) Other

2) Production Record Type Legend:

- (A) Harvested Production: sold/commercial storage.
- (B) Harvested Production: farm stored/measured by insured.
- (C) Harvested Production: pick/daily sales records.
- (D) Harvested Production: automated yield monitoring system.
- (E) Harvested Production: farm stored/measured by authorized representative.
- (F) Harvested Production: livestock feeding records.
- (G) Harvested Production: field harvest records.
- (H) Harvested Production: other.
- (I) Unharvested and destroyed. (ARPI only)
- (J) Unharvested and put to another use. (ARPI only)

- (K) Unharvested and production appraised by AIP (ARPI Only).
- (L) Unreported production. P26 Only.
- (M) Claim for indemnity. For CCIP policies only.
- (N) Appraisal (non-loss). For CCIP policies only.
- (O) UUF or third party damage
- (P) Unharvested with Harvest incomplete. (ARPI only).
- (Q) Zero production when no claim/appraisal/UUF/3rd party or production record. For CCIP policies only.
- (R) Harvested Production: Actual production allocated using pre-harvest appraisals
- (S) Appraisal (uninsured cause of loss not UUF or 3rd party). Actual production. For CCIP policies only.
- (T) No production. Unharvested, delayed claim or records unavailable from processor (not for ARPI).
- (Z) Zero Planted Acres

3) Insurability:

- (A) Insurable
- (B) Uninsurable
- (C) Uninsured Acre

4) Yield Indicator:

- 2015** - Yield Exclusion eligible year and YE opt out checkbox if elected on county/crop. See county/crop options.
* T-Yield used for Yield Exclusion

^{AR} - Authorized Representative, ^{ARL} - Authorized Representative Limited, ^{DA} - Determined Acres

IMPORTANT: If you have an insured whose unit structure is changing in the 2025 crop year, the changes must be made in the 2025 crop year and the corresponding APH Database(s) updated. For example, in 2024CY the producer insured their IRR & NI corners for the pivot in the same unit, however they did have a discernible break and kept the production separate during the 2024 crop year. When you enter the production for 2024 you will enter the total production for both the IRR/NI lines, however in 2025 you will need to create separate databases and enter the correct production for both the IRR and NI lines.

Online platforms may not be available at all times.
