

FAQ

Q

What is IPR?

A

The Insured's Production Reporting Date is the date provided by RMA requiring insureds to report production on the current crop year policy, unless otherwise specified in the policy or FCIC-approved procedures. This change enables RMA to conduct advanced data analysis, serving as a final step in a crop insurance policy.

Types / Practices		Unit Structure	Prices	T-Yield	Yield Exclusion	Dates

Insured's Production Reporting Date		11/15/2025		11/15/2025		

IPR Dates can be found in the Dates tab of the county actuarials from the RMA AIB website.

FAQ

How does the IPR process work?

 A

The 2024 production data is recorded and signature dates entered into the GreatAg system. Upon entry, GreatAg will transfer this information to the 2025 crop year and generate the Actual Production History (APH) lines. This data is then forwarded to the Risk Management Agency (RMA) that evening. By noon the following day (Tuesday - Saturday), provided there are no errors or audits, the system will automatically generate the APH form (M202), which will be accessible in the document tree for further processing and record-keeping.

Note: Although IPR can be keyed at anytime in the correct year in GreatAg, the data will not “roll” into the next year APH until RMA releases the crop ADM information.

FAQ

Q When do I change unit structure?

A

Production is reported based on the unit structure in effect the year the crop was produced at the end of the policy crop year.

Example: If an insured's unit structure is changing in the following crop year, the changes must be made in the following crop year and the corresponding APH Database(s) updated. For example, in 2024CY the producer insured their IRR & NI corners for the pivot in the same unit, however they did have a discernible break and kept the production separate during the 2024 crop year. When the 2024 production is entered on the 2024 policy total production for both the IRR/NI lines should be keyed. However, in the 2025 policy separate databases must be created and the production reported separately for both the IRR and NI lines.

FAQ

Q How is IPR handled in the event of policy transfer or an agent no longer has the policy the following year?

A

Policies that are transferred to another AIP must still report production to the ceding AIP and may provide a copy of the signed production report to their new AIP. Do note that according to procedure, Assigned Yield penalties apply if production is not reported to the ceding AIP.

Example: You own the policy as the agent in 2024. The policy is transferred to a different agency for 2025. IPR procedures state that the production must be submitted and keyed from the agent for the 2024 crop year.

FAQ

Q What 2024 Forms are available for reporting IPR?

A

- The below forms are available in GreatAg for reporting IPR:
- M205 - Schedule Of Insurance (SOI) with Production Report
- M202 – Production and Yield Reporting form
- M711 – Revenue Loss Worksheet and Production Report
- G205 – Map Based Schedule of Insurance

Q What additional resources are available?

A

- Quick Card: IPR Process for Policies moving from CRS to Great American in 2025
- Quick Card: IPR in GreatAg
