- The total insured planted acreage in the unit.*

## T-Yields

Simple average T-yields, personal T-yields, and determined T-yields are applicable the first year of New Breaking Acreage.

## Master Yields

Master yields are not applicable the first year of New Breaking Acreage.

## Prevent Plant

Prevent plant acreage is not applicable on New Breaking Acreage the first year.

## Insurability Requirement

Starting in the 2025 crop year, New Breaking Acreage that is over 5% of the total planted acreage in the unit is required to be insured the initial year.

- Relief provided for 2025 per MGR-25-003.
- NB acreage now insurable according to Section 9 of the CCIP, Basic Provisions.

## Definition

- Acreage that has not been planted and harvested, or insured, in any 1 of the 4 previous crop years.
  - Planted includes annual regrowth of a perennial crop.
  - Harvested does not include grazing.
  - Insured includes insured PP acres.
  - Only crops insurable under the CCIP are considered when determining if the acreage has been planted and harvested, or insured.

## Insurability

- New Breaking is insurable at 85% of the APPLICABLE T-yield unless that acreage:
  - Is identified as NS acreage in accordance with section 9(c)...
  - Is uninsurable acreage in accordance with 9(d): or
  - Constitutes 5% or less of the insured planted acreage in the unit, for which the NB reduction to 85% of the applicable T-yield will NOT apply.
