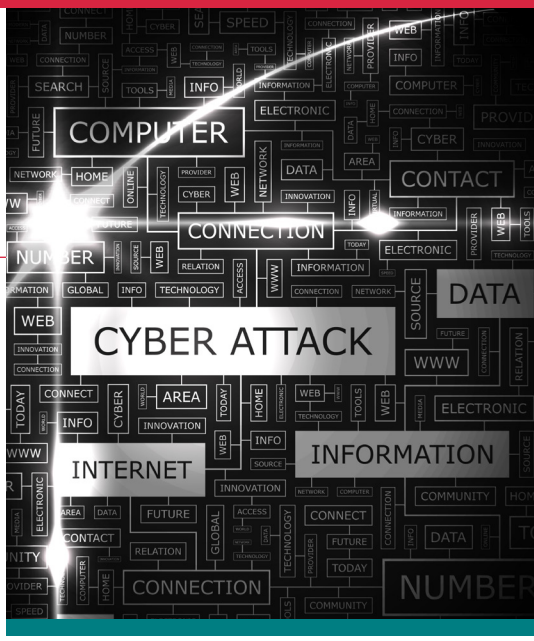
A cyber attack can cause significant financial loss. Protect your clients with Great American's Cyber Risk Insurance Policy.



Recent headlines remind us of the significant impact a cyber attack can have on a business. From financial loss to reputational damage, the effects can be lasting and potentially devastating to businesses of all sizes.

Why do your clients need cyber coverage?

General liability policies typically do not cover cyber-related loss. Data and security breaches, cyber extortion, data destruction and firewall and network security attacks are just a few of the things that could put your clients at risk.

Great American's Executive Liability Division is pleased to offer a solution to protect your clients from financial loss resulting from cyber-related crimes.

Cyber Risk Insurance Policy highlights:

- Limits up to $10 million available
- Flexibility to purchase shared or separate limits for first party and liability coverages
- $500 minimum premium
- Data compromise response by the data privacy and security practice at the law firm of Vedder Price
- Excess quotes available
- Underwritten by Great American E&S Insurance Company, surplus lines license required
