Policy Limits

The policy establishes a credit limit that determines the maximum projected exposure during the policy period, and a policy limit of liability, which is the maximum amount the insurer will pay for all losses related to transactions insured during the policy period.

Premium

The premium amount can be calculated on the amount of policy limit approved or on estimated sales volume. Premium rates are influenced by various factors including country risk, obligor risk, length of payment terms, and your loss experience.

Claims Filing

Claims can be filed as early as 180 days but no later than 360 days after the due date. Prior to filing a claim, you must make a written demand for payment to the obligor. Approved claims are paid within 60 days of the insurer's receipt of a completely documented Proof of Loss.

Overdues Reporting

If a buyer is more than 30 days past due in paying, an overdue report must be filed each month until the buyer pays or a claim is made.

Who Should Apply?

Our target customers are companies looking to mitigate country risk exposures or larger buyer limit concentrations of \$1 million or more. Minimum premiums of \$20,000 will apply to all single buyer policies.
