

Management Controls For Commercial Vehicle Safety

Organizations are usually successful because they do a good job of establishing adequate controls to assure that corporate objectives are met. When considering objectives, it should be realized that safety and efficiency go hand in hand. A worthwhile objective for any firm should be to produce and deliver a quality product as safely and efficiently as possible.

The same lack of management controls that result in accidents will also result in other operational failures. Objectives for Loss Prevention, efficiency, and quality all require the establishment of adequate management controls, if they are to be attained.

The same lack of management controls that result in accidents will also result in other operational failures.

The following management controls for Loss Prevention should be considered:
